Memorandum to Files

From: Don Johnson

Subject: Tract U-a/U-b - General Tract Inspection

Personnel Present

Don Johnson	-	OSO	Tom Portal	-	UDOGM
Jim Godlove	-	WRSOC	Susan Linner	-	UDOGM
Tom Tetting	-	UDOGM			

ACTIVITIES:

Inspection on November 11, 1982, conducted with the Utah Division of Oil, Gas and Mining at Tracts U-a/U-b. The off-tract sampling site at Hell's Hole Canyon was observed where shale was obtained for some retorting experiments. The inspection tour continued to the area of the retention dam, the two associated top-soil-like material stockpiles, the wastewater treatment area, mine services building area, potable water area, temporary magazine area and the decline development area. Work was in progress on the large top-soil-like material stockpile in preparation for revegetation. The decline was cut about 20 feet into the collar and the Pourat mining machine was idle while roof-bolting was in progress. A small shack was under construction to protect the generator from the weather.
